About TruBuild

Trubuild is an AI-driven procurement platform designed for construction. Our platform uses AI to make vendor evaluations faster, more transparent, and privacy-focused. By improving decision-making while protecting sensitive data, Trubuild enables construction teams to save time, reduce risk, and make confident, informed choices.

Smarter Tender Decisions for More Predictable Project Outcomes

TruBuild helps project owners evaluate contractor and consultant bids with speed, accuracy, and confidence - by automating the analysis of technical and commercial submissions.

Streamline Bid Evaluation with AI

TruBuild's AI platform streamlines bid evaluation by detecting scope gaps, pricing issues, and compliance risks—cutting review time by up to 90% and ensuring vendor alignment before contracts are awarded. Faster, smarter, and tailored for project owners.

Procurement Workflow

Problem Statement

Project owners face increasing pressure to deliver complex projects on time and within budget—yet tender evaluations remain manual, inconsistent, and prone to oversight.

✗ Time Consuming

Teams spend days or weeks extracting scope, clarifying exclusions, and normalising quotes.

✗ Inconsistent

Bid reviews vary by individual, making it hard to compare like for like.

✗ Risky

Traditional bid reviews often miss critical scope gaps, pricing anomalies, and compliance risks, leading to misaligned contracts, costly change orders, and delayed execution.

TruBuild automates the tender evaluation process—so Project Owners can make faster decisions and drive greater control over project delivery.

Increased Efficiency

Teams spend days or weeks extracting scope, clarifying exclusions, and leveling quotes.

Consistency

Standardises scoring across technical and commercial criteria for consistent comparisons

Risk Reduction

Flags pricing anomalies and missing cost elements before contracts are awarded

Faster Mobilisation

Generates audit-ready reports to support approvals and debriefs

Evaluation Process Breakdown

Prequal & RFP Prep

150-250 person-hours

1

Q&A/Clarifications & Addenda

150-250 person-hours

2

Technical Evaluation

350-700 person-hours (SMEs + site checks)

3

Commercial Evaluation

120-220 person-hours (pricing/compliance)

4

Governance

80-150 person-hours (steering/committees, audit trail)

5

Award & Handover

50-100 person-hours (debriefs, contracts handover)

6

Total: **800-1,800 hours per tender** (1,200 hours midpoint)

Current Evaluation Effort & Cost

Evaluations consume 3,000+ hrs per large package — 45% by Engineering teams alone.

TruBuild AI Efficiency Gains

Automated Bid Parsing & Classification

Reduces manual document review by 30-50%

AI-Assisted Compliance & Technical Scoring

Reduces SME effort by 20-30%

Automated Briefing & Committee Packs

Reduces governance preparation by 70%

Benefits

- 

Faster Bid Evaluation

Cut review time by up to 90%, structure bids instantly, and speed up preconstruction.
- 

Higher Quality Awards

Award contracts to top bidders—based on data, not guesswork.
- 

Risk Mitigation

Mitigate risks early by spotting non-compliance, pricing issues, or scope gaps before signing.
- 

Improved Commercial Control

Flag pricing issues, prevent budget overruns, support benchmarking.
- 

Standardised Decisions

Keep a complete digital audit trail of scores, logic and clarifications for full transparency.
- 

Scalable & Consistent Procurement

Standardise evaluations across projects for consistent, scalable procurement governance.

Cost Anomaly Detection

Automatically flag abnormally high or low prices, missing entries, and inconsistent scopes.

Data Privacy & Security

✓ Core Privacy Commitment

Your information stays private. We make sure it's anonymous and contains no personal data. We never use your data to train our systems without your permission.

✓ Cloud & Compliance

We store your data in secure locations chosen to follow local laws always in encrypted form.

✓ Data Lifecycle Management

You're in control of your data. You can delete it anytime. If you do nothing, we'll still remove original files after one year and any created copies after two years.

✓ Ethics & Governance

We never sell or share your information, and we're always open about how we handle it.

✓ Encryption & Security

We lock your data with the same advanced technology used by banks. This protection is in place when it's sent, stored, and accessed—so it's safe every step of the way.

✓ Certifications & Assurance

We are compliant with ISO27001, SOC2, GDPR and carry out regular checks to our systems for weaknesses, with the help of trusted security experts.

✓ Hosting Options

Most clients use our shared secure system, but we also offer a private setup with your own server, storage, and backups for maximum privacy.

✓ Single-Tenant Architecture

Fully siloed data with no cross-contamination. Maximum security, compliance, and control.

Annual Procurement Volume

150 Tenders / Year

SAR 200 bn In Assets

Challenges

Osool's procurement team struggled with manual reviews and inconsistent evaluations, causing delays and costly issues across projects.

1. Manual tender reviews
2. Inconsistent criteria
3. Delayed awards
4. Scope creep & missed risks
5. Costly change orders

Solution

TruBuild was adopted as the central platform for tender evaluations, bringing speed, consistency, and visibility across all projects.

1. Centralized platform across units
2. Faster, consistent evaluations
3. Real-time insights for leadership
4. Used on 12+ projects simultaneously
5. Covered both technical & commercial bids

Results

Over 18 months, TruBuild streamlined procurement across 15+ capital projects, delivering significant time savings and reducing post-award issues.

1. **15+ projects, 60+ bids** evaluated across departments
2. **68% faster evaluations** with standardized scorecards
3. **35% fewer change orders** from better scope alignment
4. **One source of truth** for leadership across all tenders
